**FOLLOW UP:** After determining the lowest rated area(s), have your team identify which of these areas would make the most difference IF YOU FOCUSED your energies on improvement. Once you have these areas identified (best to focus on just 1 or 2), spend the rest of your time brainstorming ways to positively impact these weaknesses. Encourage everyone to engage in tossing out ideas. Keep notes on those ideas your team believes are best and commit to implement those changes as you move forward.
